FeeLens

See what a portfolio really costs. In minutes, with proof.

Briefing for Massimo · Safe Capital, Lugano · November 2026

Concept and working demo · every figure in this deck is synthetic

THE PROBLEM

Bank statements show only part of the cost

CHF 40'160

what the bank's cost report lists as charged

CHF 61'450

what the portfolio actually costs per year, at least

Synthetic prospect P-1042, CHF 4.3m at two banks. The CHF 21'290 gap is fund costs taken inside product prices, and Bank Beta's fees are still unknown.

Costs are spread over six kinds of document

Fee statements	management, custody
Contracts & tariffs	rates, tiers, minimums
Trades & FX	commissions, FX margins
Fund prices	ongoing charges inside NAV
Structured notes	issuer margin in the price
Insurance wrappers	policy fees on top

WHAT FEELENS DOES

Upload, verify, compare: a free cost check in one meeting

Upload

The client's statements, cost reports and contracts from any bank: PDF, scans, Excel.

Verify

Every cost is extracted, linked to its page, checked against other documents, and labelled proven, estimated or unknown.

Compare

Same holdings with Safe Capital and its custodian bank, switching costs included, on one page for the client.

No source, no verified figure

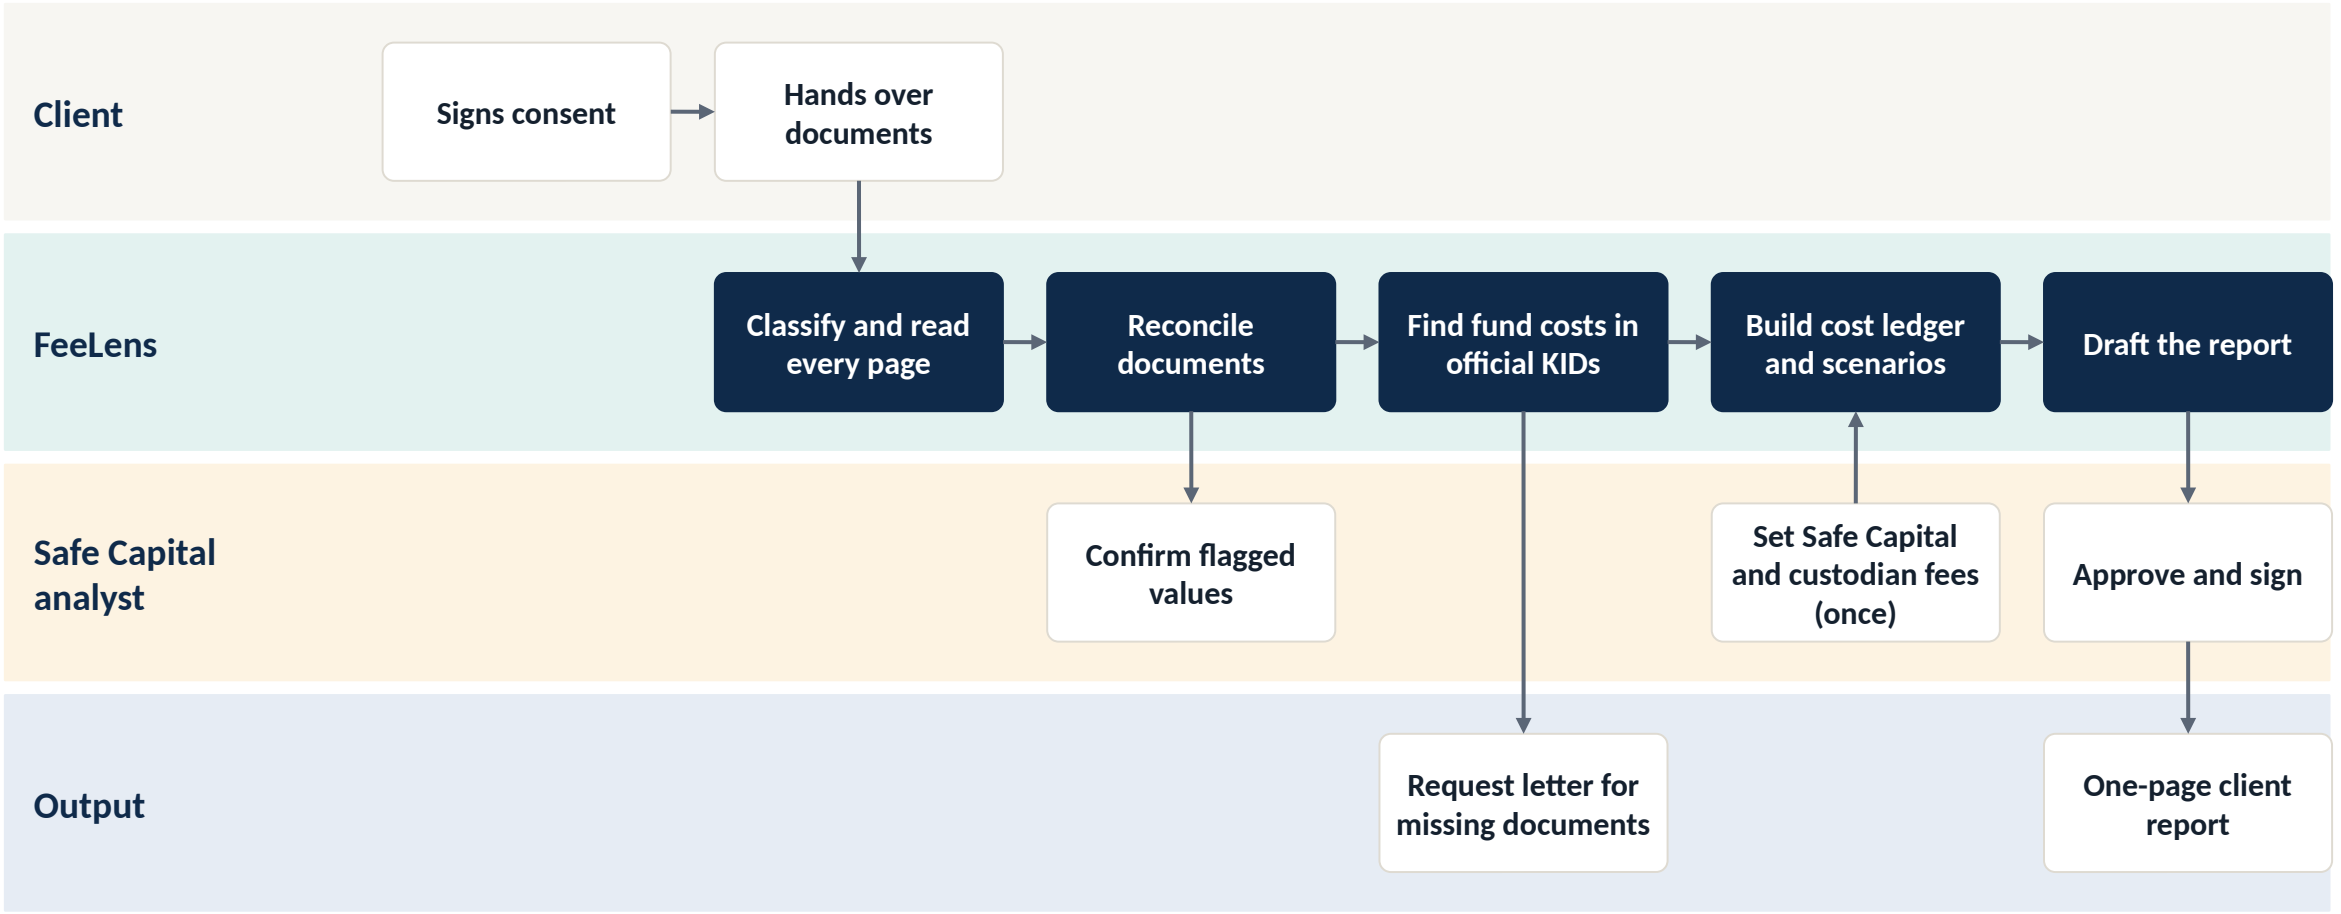

Missing is never zero

No comparable service, no savings claim

Target: a first draft within minutes of upload, then an analyst check. Speed will be measured in the pilot.

WORKFLOW

Who does what, from documents to report

The client sends the missing documents; the analysis updates and the gaps close.

DOCUMENTS

What the client brings, and what each document can prove

DOCUMENT	WHAT WE READ	PROVES	CANNOT PROVE	NEED
Portfolio / asset statement	ISIN, quantity, price, value, currency, date, total	Holdings at a date	Fees	**Essential**
Annual cost & charges report	Service costs, product costs, third-party payments	Near-complete annual cost	FX margins, if not listed	**Essential**
Fee advice / cash statement	Fee type, period, base, rate, amount, VAT	Every billed debit	Costs inside products	**Essential***
Mandate contract / tariff	Rates, tiers, minimums, all-in scope, exclusions	What was agreed	What was billed	**Helpful**
Trade & FX confirmations	Commission, third-party fees, stamp duty, FX rate	Explicit trading cost	Contract terms	**Helpful**
Fund KID (official)	Share class, ongoing, transaction, entry/exit costs	Product cost rates	What the client paid	**We fetch**
Retrocession statement	Payments from product providers, refunded or kept	Conflicts and refunds	Client cost directly	**Ask bank**
Insurance policy statement	Policy value, wrapper charges, underlying funds	Wrapper charges	Underlying fund costs	**If wrapped**

* either the cost report or the fee advices. Accepted formats: PDF, scans or phone photos (OCR), Excel, CSV. Italian, German, French and English.

REAL DOCUMENTS

What Swiss banks publish, and what only the client has

DOCUMENT	PUBLIC?	WHAT WE FOUND	WHERE FEELENS GETS IT
Bank price list	Yes	ZKB, Raiffeisen Locarno, Julius Baer Europe (Luxembourg). UBS publishes one; this environment could not download it	Bank website, checked for date and booking entity
Fund KID	Yes	Every fund share class, e.g. iShares Core MSCI World (IE00B4L5Y983)	Official source, by ISIN
Mandate / advisory fee	No	Julius Baer: “not part of this document”. UBS Manage pages give no rates	The client’s contract or fee advice
Statement of assets	No	UBS: ordered free in e-banking as a PDF. No public specimen from UBS or Julius Baer	The client
Annual cost report	On request	UBS: cost details “on request” from the client advisor (FinSA page)	The client asks the bank; FeeLens drafts the letter
Retrocession report	On request	Julius Baer: reports on inducements; UBS: on request	The client asks the bank

So the demo uses real public price lists and KIDs, and synthetic client statements. A real anonymised statement from Safe Capital is the next step.

REAL DOCUMENTS

Real public documents, and the figures FeeLens takes from them

Bank price list

Zürcher Kantonalbank

Preisübersicht Anlagegeschäft · Sept 2025 · German

Custody, Swiss-held securities	**0.30% p.a., min CHF 3/month**	p.1
Custody, foreign-held securities	**0.40% p.a., min CHF 4/month**	p.1
Brokerage, Swiss shares to 100k	**0.50% online · 1.00% other**	p.2
FX spread, main currency < 50k	**up to 1.00%**	p.3
Swiss stamp duty, shares	**0.075–0.150%**	p.5

Bank price list

Raiffeisenbank Locarno

Dienstleistungspreise Anlegen · from 1 Jan 2025 · German

Custody, securities account	**0.25% p.a.**	p.2
Minimum	**CHF 12.50 per quarter**	p.2
Surcharge, complex markets (e.g. USA)	**+0.10% p.a.**	p.2
Low-priced securities	**CHF 5.00 per quarter, per position**	p.2
Fund savings-plan account	**0.25% p.a., min CHF 5 per quarter**	p.2

Fund KID (PRIIPs)

iShares Core MSCI World UCITS ETF

IE00B4L5Y983 · USD Acc · BlackRock · 3 Sep 2026

Ongoing costs	**0.20% p.a.**	p.3
Transaction costs	**0.00% p.a.**	p.3
Entry / exit charge	**none / none**	p.3
Performance fee	**none**	p.3
Cost on USD 10'000, year 1	**USD 20**	p.3

Figures quoted as printed by each issuer; every value keeps its page. Client statements in the demo stay synthetic for privacy. Fees change: FeeLens checks the document date and the issuing entity.

A real price list, field by field: Julius Baer Europe

SCHEDULE OF PRICES AND SERVICES

Banking and custody

Bank Julius Baer Europe S.A., Luxembourg

Publ. No. PU00505EN · June 2025 · English

“FOR CLIENTS BOOKED IN LUXEMBOURG ONLY”

FeeLens reads the cover line too: this tariff is valid only for Luxembourg-booked accounts. For a client booked in Switzerland it is rejected, exactly the check on the reconciliation slide.

Custody fee, cumulative bands	**0.300% to 5m · 0.250% 5–10m · 0.200% 10–20m · 0.150% over 20m**	p.3
Custody minimum	**EUR 360 per quarter**	p.3
Equities, main markets	**1.500% to 50k, falling to 0.400% over 1m · min EUR 200**	p.4
Equity funds	**1.250% to 50k, falling to 0.500% over 1m**	p.4
FX spot	**up to 3.000%**	p.6
Banking service fee (Premium)	**EUR 400 per quarter**	p.7
Transfer out to another bank	**EUR 100 per position**	p.8
Advisory fee	**“not part of this document”**	

Quoted as printed. Shown as an example of a public document; no comparison with Julius Baer is implied.

DATA

Everything extracted becomes one of five kinds of data

Positions

- ISIN and share class
- Quantity, price, value
- Currency, valuation date
- Bank, account

Fees charged

- Fee type and period
- Base and rate
- Amount, VAT
- Debit date

Contract terms

- Rates and tiers
- Minimums
- All-in scope
- Booking entity

Product costs

- Ongoing charges
- Transaction costs
- Entry / exit (max)
- KID date and class

Evidence

- File and page
- Box on the page
- Original text
- Who confirmed it

Every position, fee, term and product cost carries its evidence. Each one also gets a status: observed, contractual, estimated, not a paid cost, or not determined. A number with no evidence never reaches the cost total.

COST LAYERS

Ten cost layers, in four places a client may never look

Debited from the account	Inside product prices	Inside execution rates	Wrapper and one-off
Service: management, advisory, all-in	Funds and ETFs: ongoing and transaction costs	FX margins and bid/ask spreads	Insurance wrapper charges
Custody and account	Structured products: issuer and distribution margin		Switching: transfer, exit, sale costs
Trading: brokerage, third-party			
Financing: Lombard interest			
Taxes: VAT, stamp duty			

Beside the total, never inside it: retrocessions paid by product providers to the bank. They are already part of fund costs; only a refund to the client lowers the cost.

EVIDENCE

Every cost carries a status, and only some are added up

STATUS	MEANING	EXAMPLE (P-1042)	AMOUNT	IN THE TOTAL
Observed	Taken from a bank document	Advisory fee, Bank Alpha	**CHF 25'600**	**Counted**
Contractual	Calculated from an agreed tariff	Safe Capital fee, proposal	**CHF 25'500**	**Counted**
Estimated	Official rate × position value	Global Equity Leaders, 1.08%	**CHF 9'720**	**Counted**
Not a paid cost	A maximum or an illustration	Entry charge, up to 3%	**CHF 27'000**	**Shown, not added**
Not determined	No document yet	Bank Beta service fees	**?**	**Never zero**

The fund's management fee (0.75%) is part of its 1.08% ongoing charge. It is shown as detail and not added a second time.

RECONCILIATION

Before trusting a number, documents are checked against each other

Do the numbers add up?

- Pass — Alpha positions = printed total, 3'200'000
- Pass — Beta positions = printed total, 1'100'000
- Pass — All holdings valued on 30.09.2026

Is what was billed what was agreed?

- Pass — Advisory fee = 3.2m × 0.80%
- Pass — Custody fee = 3.0m × 0.20%
- Pass — Quarterly debits × 4 = annual report, counted once

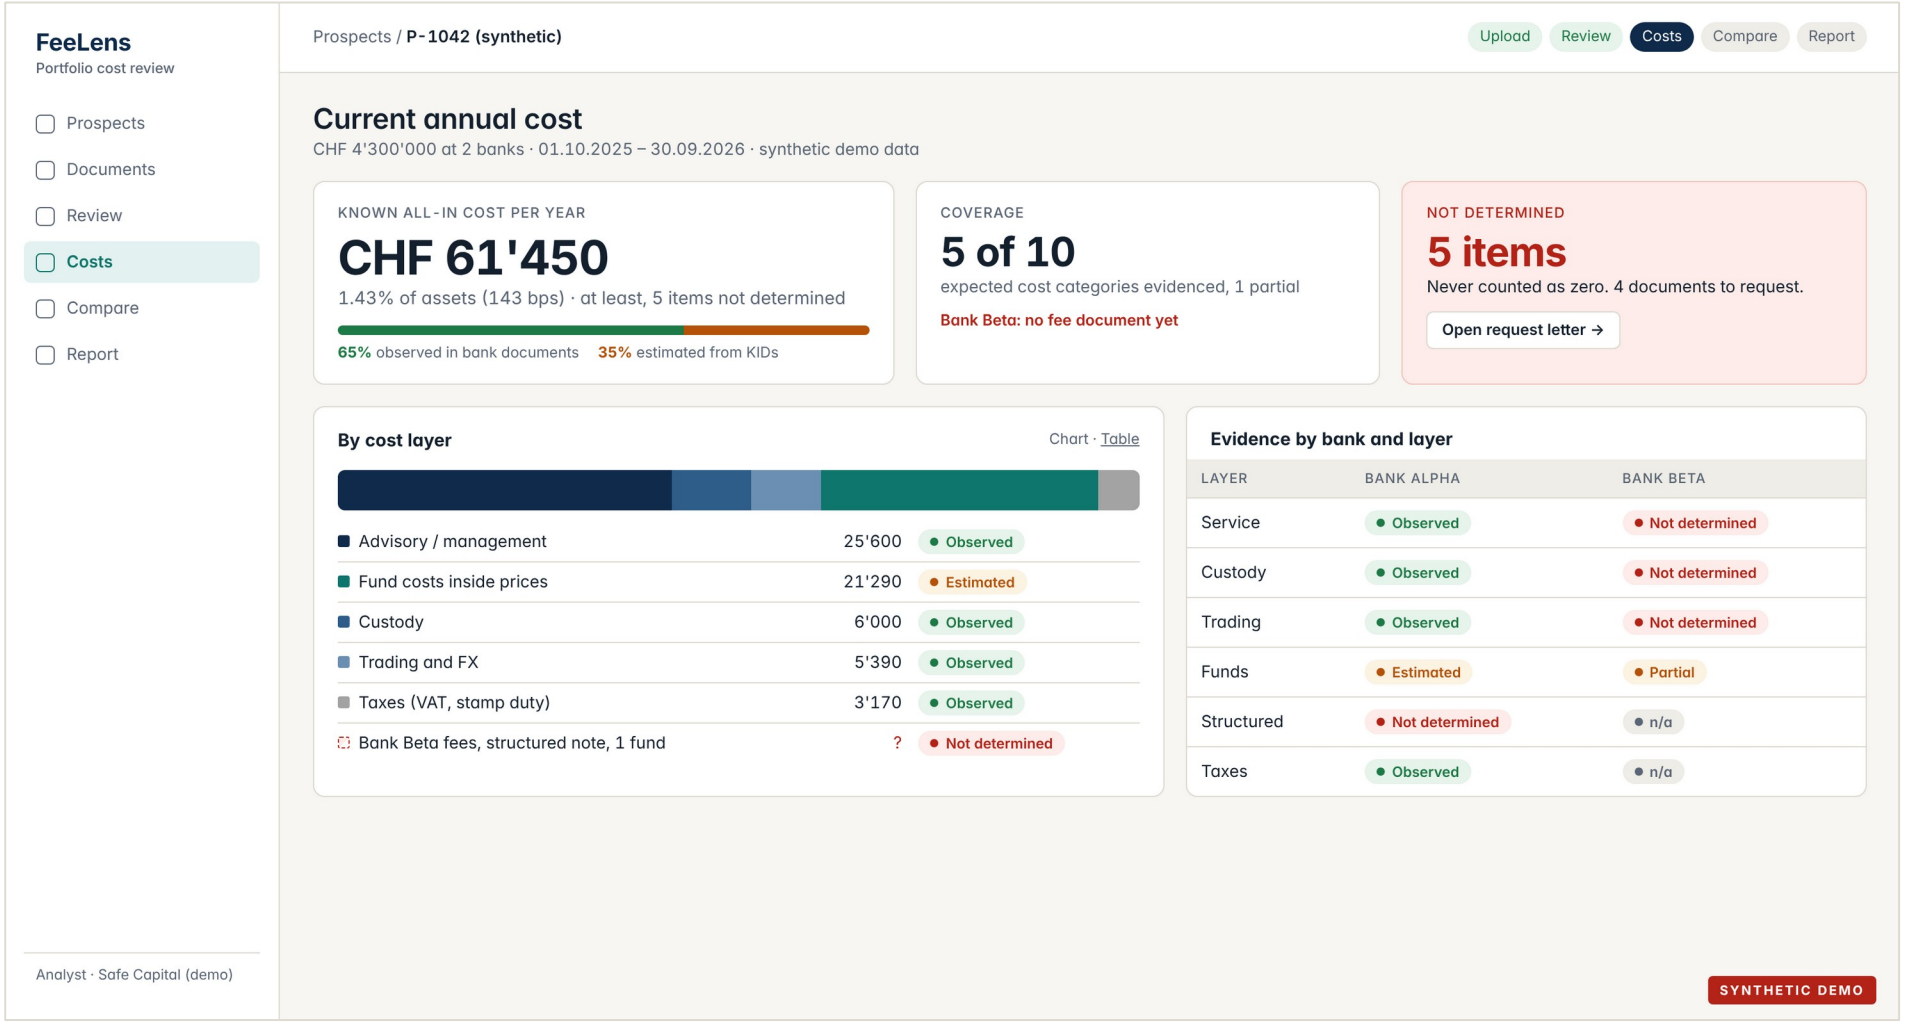

Is the source valid for this client?

- Rejected — Beta price list is from its Luxembourg entity: rejected
- Pass — Fund costs from KIDs within 2.6% of the bank's estimate
- Note — Retrocessions CHF 3'900: inside fund costs, not added

Mismatches stay visible for the analyst. They are never silently forced to agree.

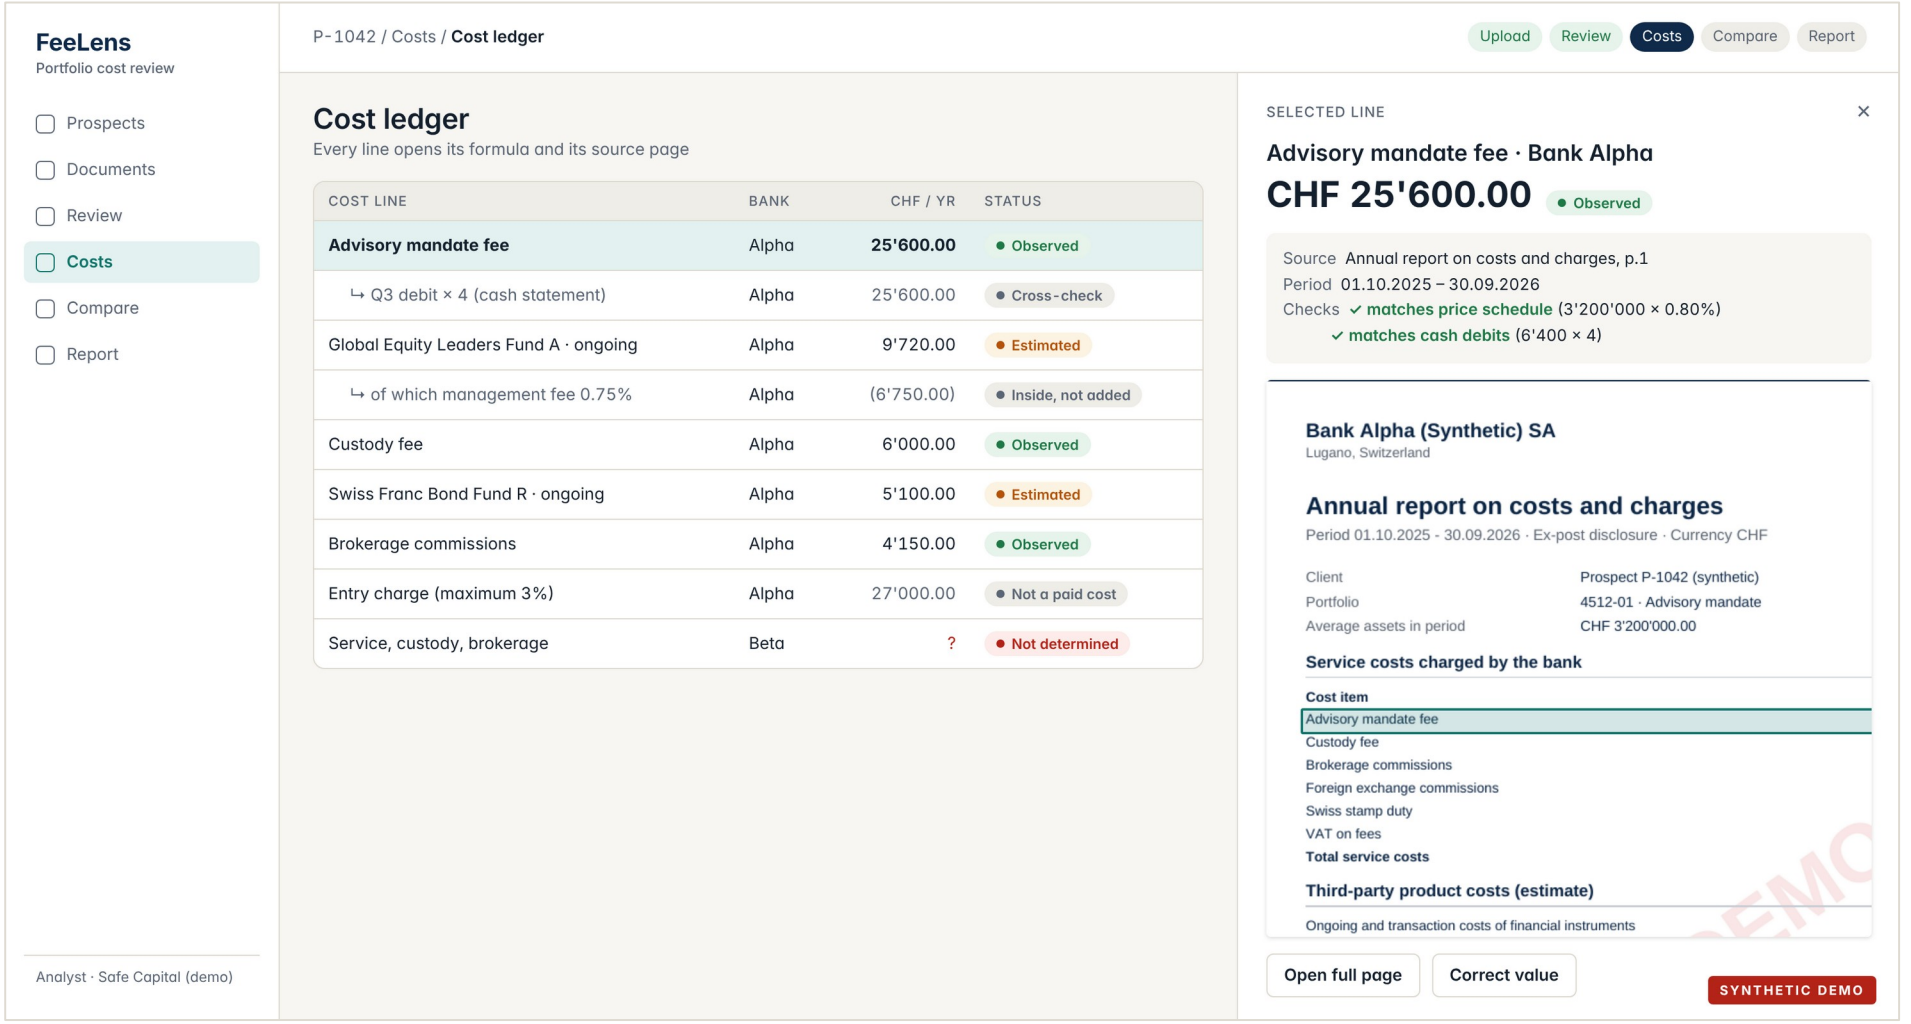

SCREEN · COSTS

The headline always comes with its coverage

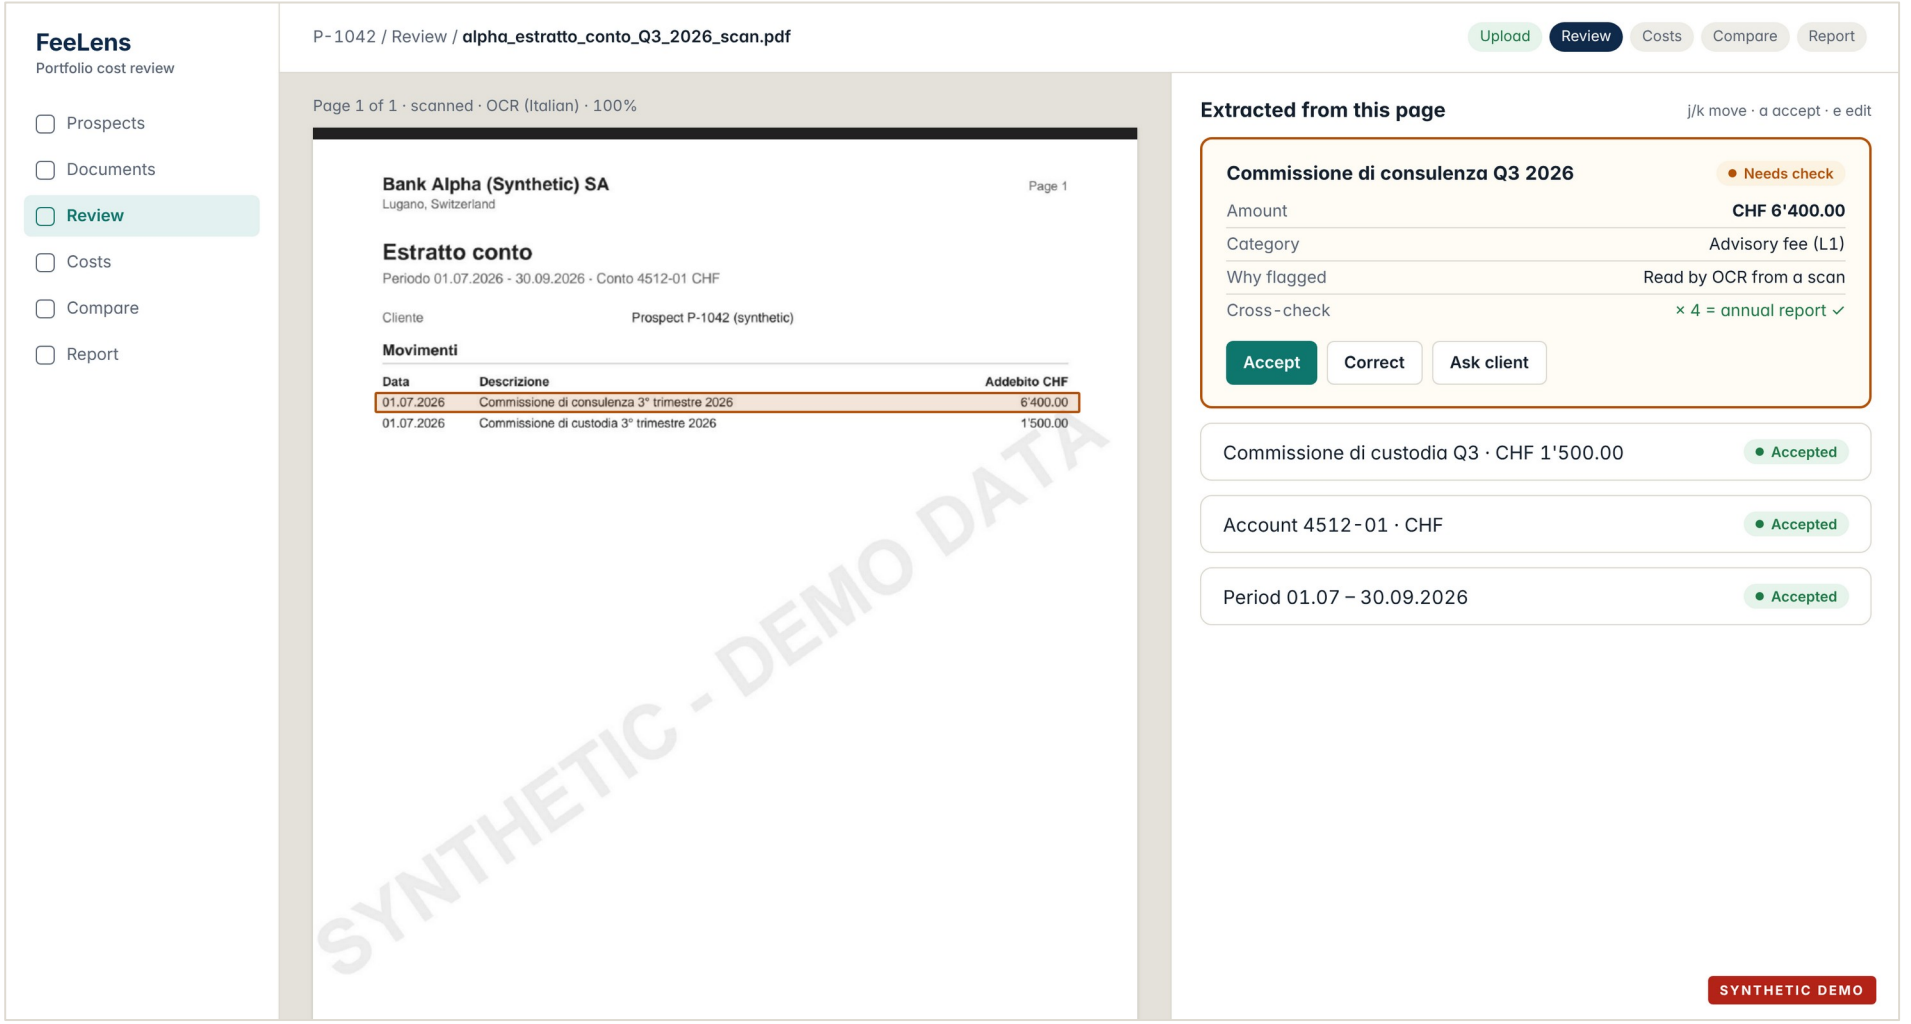

SCREEN · DRILL-DOWN

Click any number: formula, checks and source page

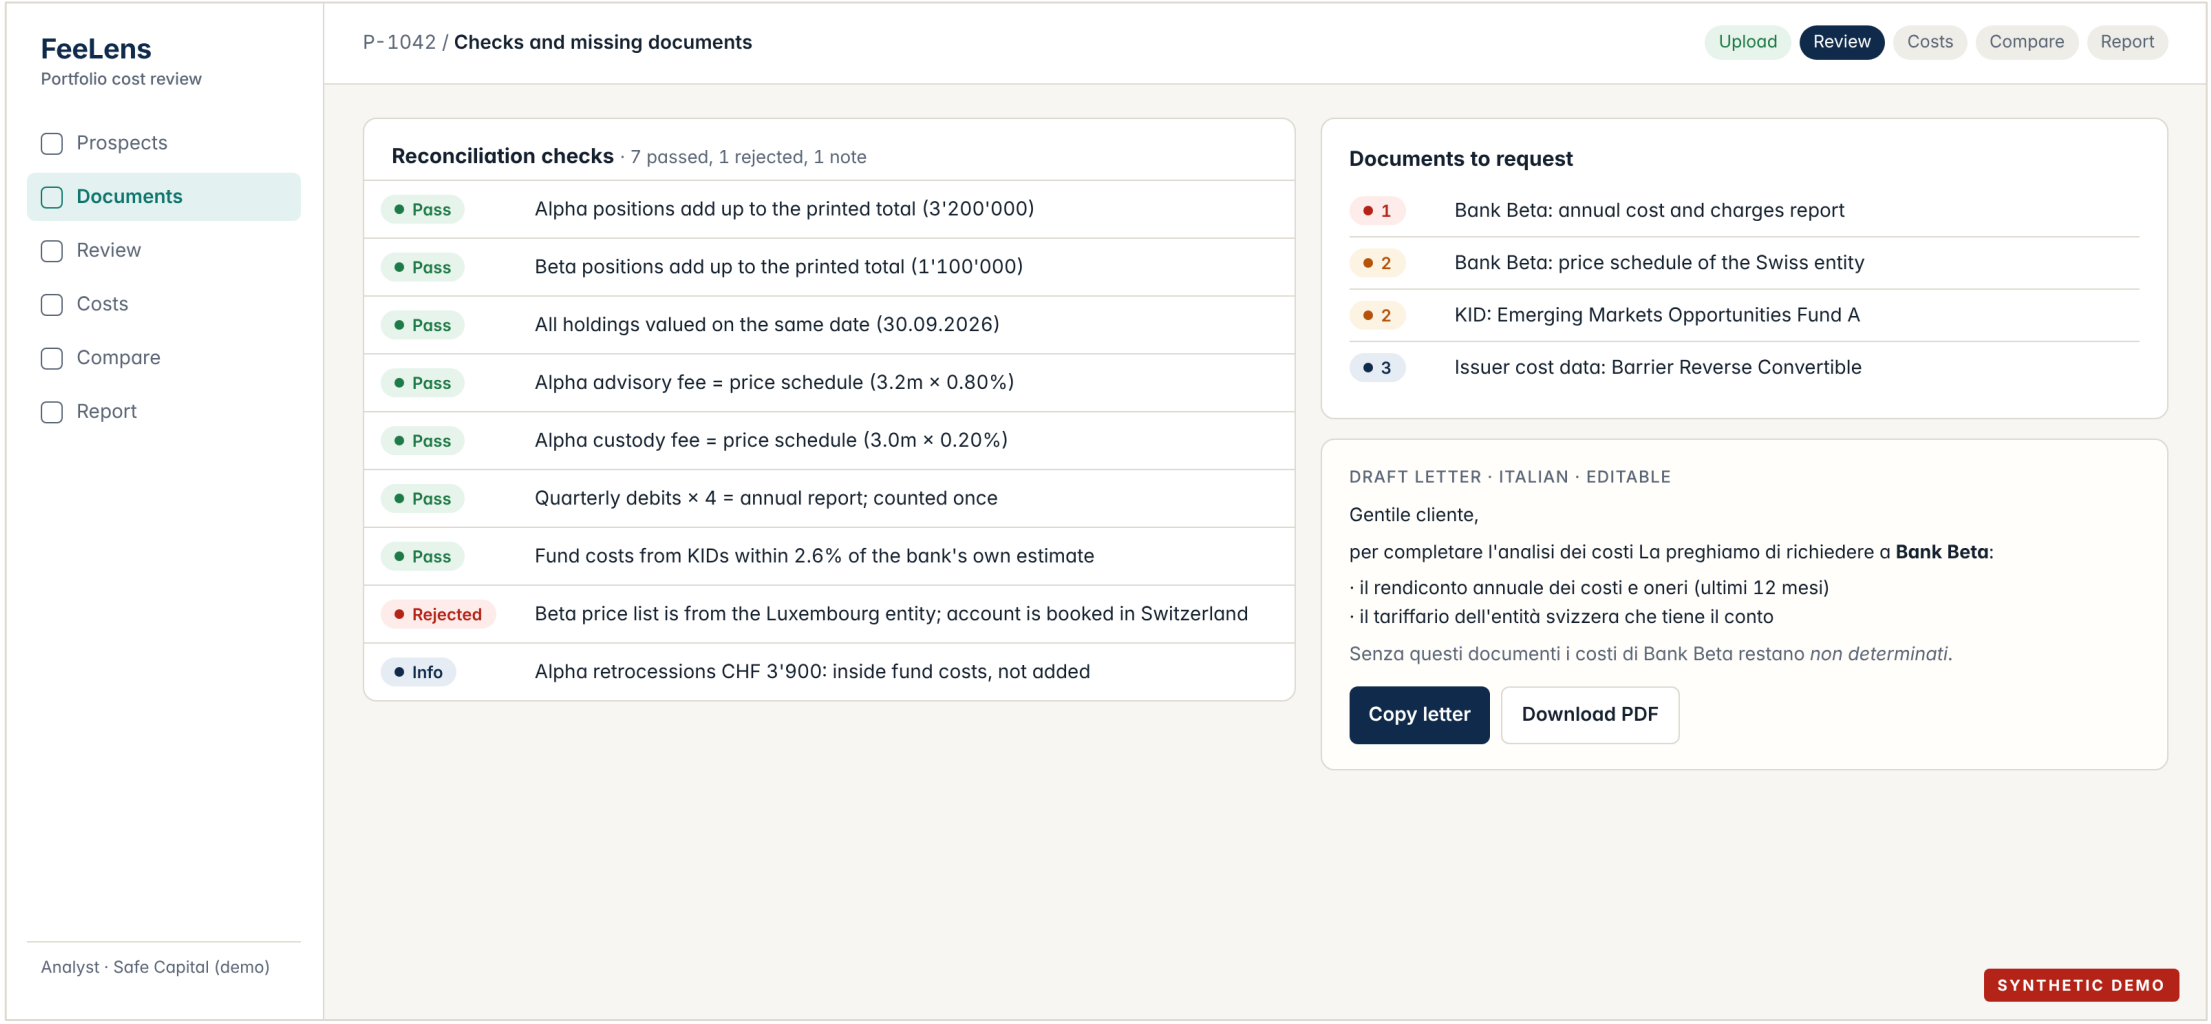

SCREEN · REVIEW

Scans and uncertain values get a human check

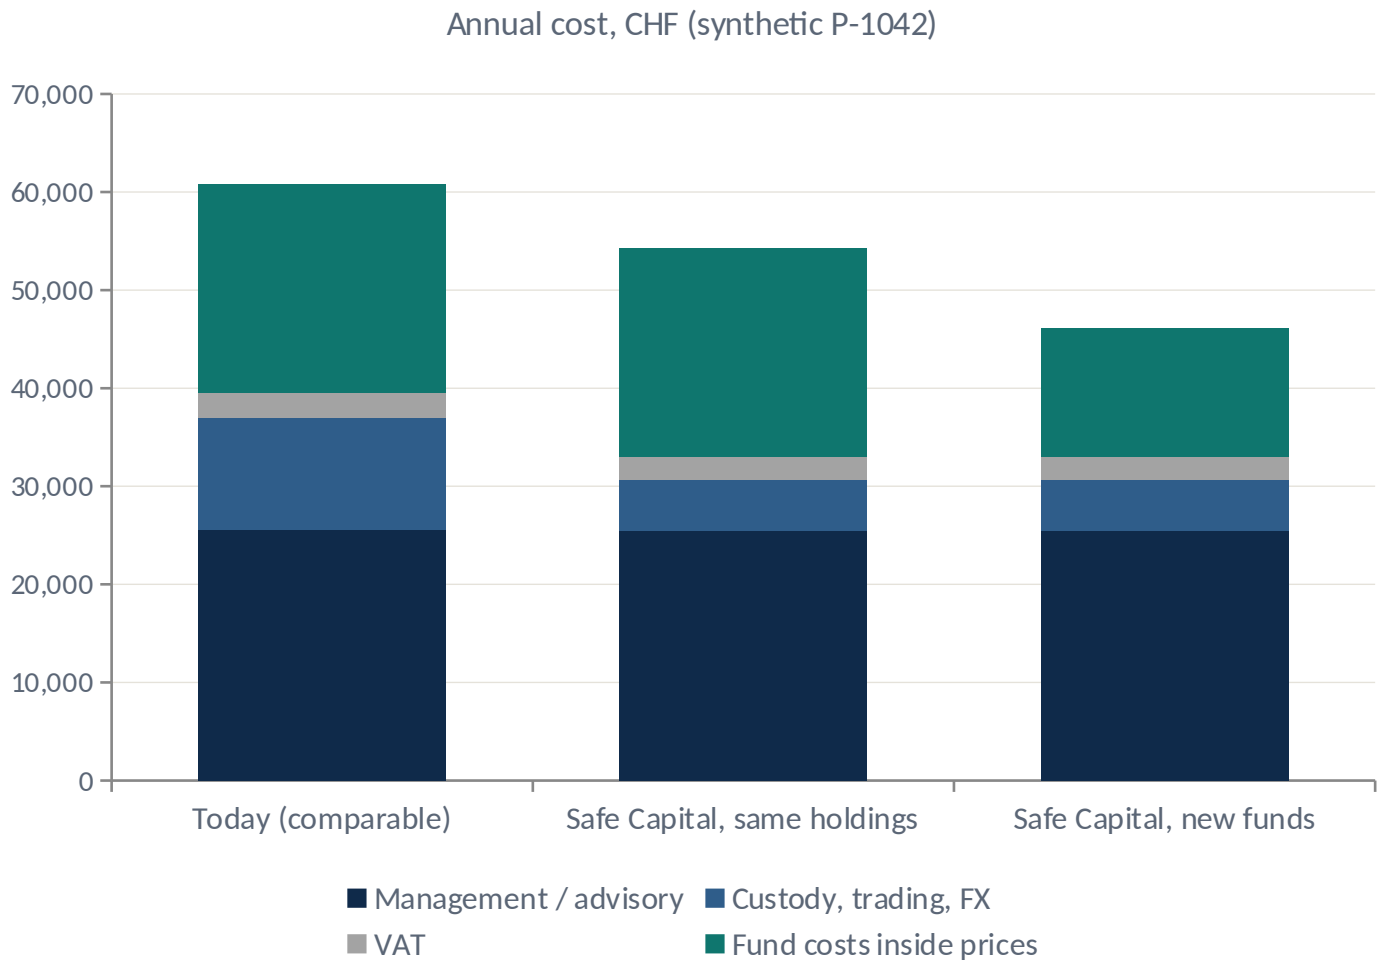

SCREEN · CHECKS

Gaps turn into a ready-to-send request letter

COMPARE

Same holdings first, with every Safe Capital cost included

Today, comparable

CHF 60'840 1.41%

Safe Capital, same holdings

CHF 54'320 1.26%

Safe Capital, new funds

CHF 46'140 1.07%

at least CHF 6'520 per year
same holdings, like for like

- "At least": Bank Beta's own fees are still unknown, so today's real cost is higher.
- Swiss stamp duty (CHF 610) is left out on both sides: it is due at any Swiss bank.
- New funds change risk and products: shown apart, never as a fee saving.

YEAR ONE

Switching costs are counted, and paid back within months here

	Same holdings	New funds
Annual difference, at least	CHF 6'520.10	CHF 14'700.10
One-off switching costs	– CHF 1'500.00	– CHF 4'000.00
Net in year one	**CHF 5'020.10**	**CHF 10'700.10**
Payback	**2.8 months**	**3.3 months**
Like for like?	Yes	No: products change

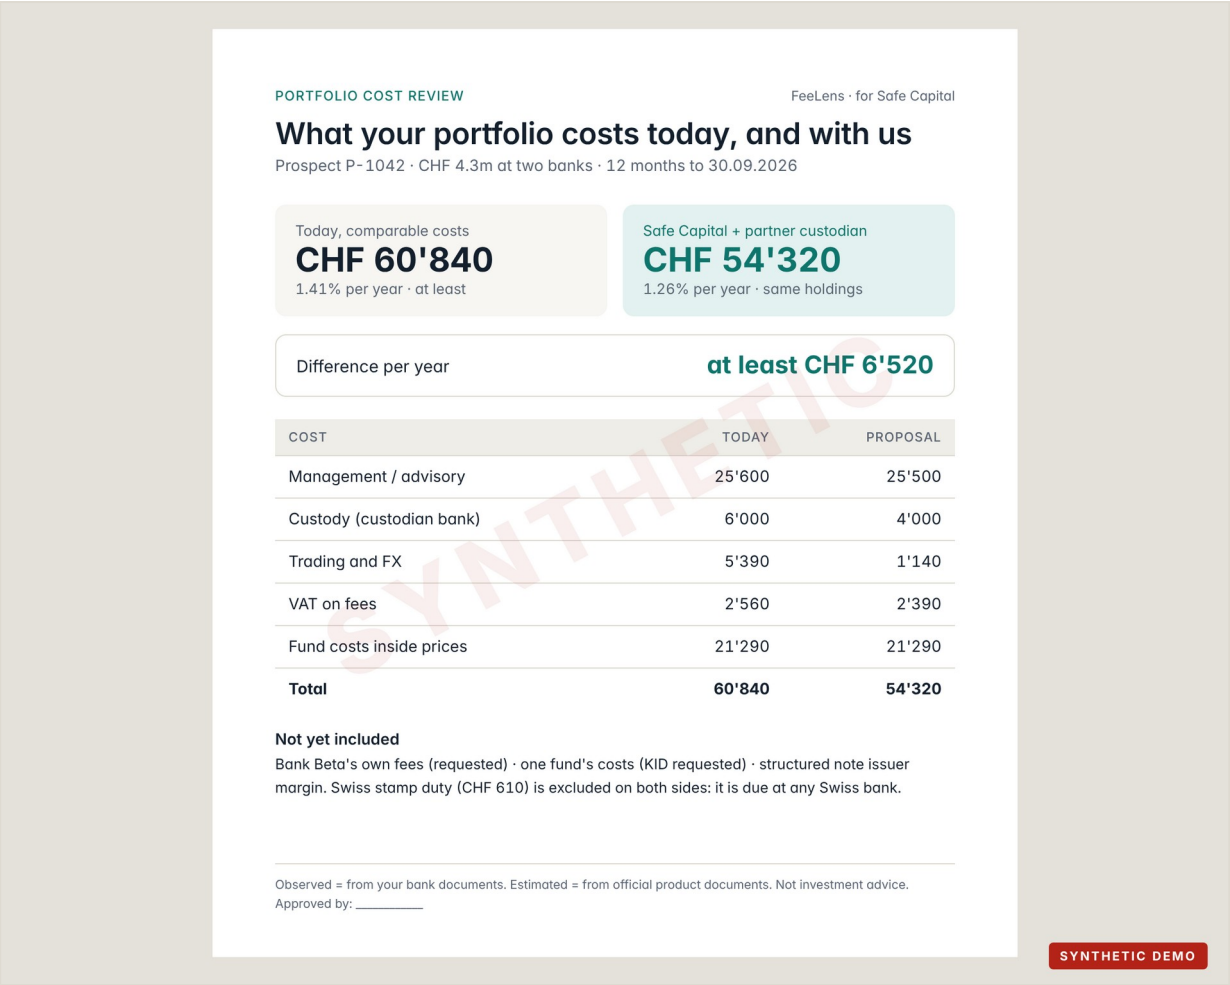

Payback = switching cost ÷ annual difference × 12

Switching costs come from the banks' transfer fees and the positions sold. In this synthetic case they are small; with real prospects exit fees and taxes can change the picture, and the tool shows that honestly.

Safe Capital's own margin on the prospect is calculated on a separate internal screen and never appears in client material.

CLIENT REPORT

One page the client can read, approved before it leaves

PORTFOLIO COST REVIEW

FeeLens · for Safe Capital

What your portfolio costs today, and with us

Prospect P-1042 · CHF 4.3m at two banks · 12 months to 30.09.2026

Today, comparable costs
CHF 60'840
1.41% per year · at least

Safe Capital + partner custodian
CHF 54'320
1.26% per year · same holdings

Difference per year — **at least CHF 6'520**

COST	TODAY	PROPOSAL
Management / advisory	25'600	25'500
Custody (custodian bank)	6'000	4'000
Trading and FX	5'390	1'140
VAT on fees	2'560	2'390
Fund costs inside prices	21'290	21'290
Total	**60'840**	**54'320**

Not yet included
Bank Beta's own fees (requested) · one fund's costs (KID requested) · structured note issuer margin. Swiss stamp duty (CHF 610) is excluded on both sides: it is due at any Swiss bank.

Observed = from your bank documents. Estimated = from official product documents. Not investment advice.
Approved by: _____

SYNTHETIC

SYNTHETIC DEMO

On the page

Today vs Safe Capital, line by line, observed vs estimated

Also on the page

What is still missing, and the stamp duty exclusion, in plain words

Never on the page

Safe Capital's internal margin and analyst notes

Before it leaves

An approver signs it off; the version is frozen and logged

HOSTING

It runs on Safe Capital's own infrastructure by default

A · In the office

One secured machine at Safe Capital. Documents never leave the building.

Recommended for the pilot

B · Swiss private hosting

Dedicated server at a Swiss provider, under a data-processing contract. For several users.

Option for production

C · External AI services

Only for hard pages, only with explicit approval, only on redacted excerpts.

Off by default

The only thing that goes online: public fund codes (ISINs) to fetch official product documents. No names, no amounts, no statements.

PRIVACY

Client files stay confidential from upload to deletion

Client consent

A short signed authorisation before any upload

Only what is needed

Names can be blacked out; costs need no identity

Encrypted

At rest and in transit; one space per prospect

Named access

Personal logins, two-factor, every view logged

No public AI on raw files

Unless Safe Capital approves a provider

Deleted on schedule

Retention agreed up front, then erased

Swiss Federal Act on Data Protection (revised, in force since 1 September 2023) applies. Bank-client confidentiality and outsourcing rules must be checked by Safe Capital's counsel; this is not legal advice.

PEOPLE AND MACHINE

The engine reads and calculates; people decide

Automatic, by FeeLens

- Recognise each document, bank and language
- Extract positions, ISINs and fees with their page
- Fetch official fund cost documents
- Run the reconciliation checks
- Build the ledger and both scenarios
- Draft the request letter and the report

A person at Safe Capital

- Enter Safe Capital's and the custodian's fees, once
- Confirm values the engine flags
- Decide whether a comparison is like for like
- Approve and sign the client report
- Present it and talk to the client

PLAN

Delivery in phases, with a real pilot before production

NOW

Demo

Working engine on synthetic documents; this deck

PHASE 1

Pilot

1–3 anonymised real prospects; measure accuracy and time

PHASE 2

Harden

More bank layouts, security review, user logins

PHASE 3

Production

Live at Safe Capital after compliance sign-off

Durations are set after the pilot, once we know how many bank layouts Safe Capital's prospects bring.

DECISIONS

Six decisions to start the pilot

01 **One anonymised real case**

holdings, 12 months of fees, the contract

02 **Safe Capital's pricing**

advisory fee, partner custodian and its tariff

03 **Comparison policy**

same holdings only, or also a new-funds case

04 **Where it runs, who sees it**

office machine or Swiss hosting; named users

05 **Consent and retention**

authorisation wording; how long files are kept

06 **Name and legal entity**

confirm "FeeLens", the entity and licence to cite

Next: one real case

No source, no verified figure · Missing is never zero · No comparable service, no savings claim

The ten layers in detail

	LAYER	WHAT	EVIDENCE	VISIBLE AS
L1	**Service**	Management, advisory, all-in, EAM fee	Mandate, fee advice, cost report	Debit
L2	**Custody & account**	Safekeeping (tiered, minimums), account fees	Tariff, fee advice	Debit
L3	**Explicit trading**	Brokerage, ticket, third-party, FX commission	Trade confirmations	In net amount
L4	**Funds & ETFs**	Ongoing, fund transaction, performance, entry/exit	KID, factsheet	Inside NAV
L5	**Structured products**	Issuer margin, distribution fee	KID, termsheet	Inside price
L6	**Implicit execution**	FX margin, bid/ask spread	FX confirmations vs reference	Inside rate
L7	**Insurance wrapper**	Policy, admin, risk charges	Policy statement, insurance KID	Partly
L8	**Financing**	Lombard interest, commitment fee	Credit agreement, interest advice	Debit
L9	**Taxes & duties**	VAT on fees (by domicile), stamp duty	Fee advice, confirmations	Debit
L10	**One-off & switching**	Transfer per position, exit, sale costs	Tariff, transfer quote	Once

From file to report: seven steps, each one traceable

Intake	Classify	Extract	Normalise	Reconcile	Ledger	Scenarios
hash, file type, size limits, quarantine, duplicates	bank, document type, period, language	text and tables with page boxes; OCR for scans	Swiss/EU number formats, currencies, rates	totals, dates, tariffs, debits vs reports	fee atoms, overlaps, statuses, Decimal arithmetic	current, same holdings, new funds, payback

Guardrails

- AI output is a suggestion until code checks it against the page text
- No arithmetic by AI: a deterministic Decimal engine does the sums
- Document text is data, never instructions

Audit trail

- Every value keeps file, page, box and original text
- Every correction keeps who, when, why, before and after
- Approved reports are frozen versions

A local, open-source extraction stack

INPUT	TOOL	WHAT IT DOES	LICENCE
Born-digital PDF	pdfplumber, Docling	Words with coordinates, tables, reading order	MIT
Scans and photos	OCRmyPDF + Tesseract	Adds a text layer; Italian, German, French, English	MPL-2.0 / Apache-2.0
Excel and CSV	openpyxl	Sheet and cell as evidence	MIT
Page images	pypdfium2, PDF.js	Render pages and highlight boxes in the viewer	Apache-2.0 / BSD
Hard scans (later)	PaddleOCR (local)	Benchmark on real documents before adopting	Apache-2.0
Avoided	PyMuPDF, cloud OCR	AGPL licence; client data would leave the office	—

Accuracy is measured per field on a gold set of real anonymised documents in the pilot, not taken from vendor benchmarks.

Words used in this deck

KID

Key Information Document: the official cost sheet a fund must publish for each share class.

Retrocession

Payment from a product provider to the bank or manager. Belongs to the client unless validly waived.

EAM

External asset manager, like Safe Capital: manages assets held at a custodian bank.

Like for like

Same holdings, same service scope, so only fees differ.

Ongoing charges (TER/OCF)

Yearly running costs of a fund, taken from its price. Includes the management fee.

Custodian bank

The bank that holds the assets. With an external manager, the client pays both.

bps

Basis points: 100 bps = 1% per year.

Stamp duty

Swiss federal tax on securities trades, due at any Swiss bank.
